Objective

Software Engineer with a Bachelor's degree in Software Engineering and a Diploma in Software Development. I aim to leverage my academic and practical experience in developing innovative software that contributes to improving processes and increasing efficiency. I aspire to join a dynamic technical team to design and develop applications that meet user needs and enhance the strategic goals of the organization, while continuously developing my technical and professional skills.

Experience

Internship | Education Administration 01/2021 – 04/2021

- Supported the programming team in developing and debugging code, contributing to improved software quality and reduced errors.
- Updated and maintained databases, and prepared data analysis reports to support management decisions and increase efficiency.
- Resolved technical issues and designed user-friendly interfaces, enhancing user experience.

Education

Technical College of Buraidah - Bachelor's Degree in Software Engineering and Applied Web Development-2025

Technical College of Buraidah -Diploma in Software Development

Courses

- Software Quality Testing - Tuwaiq Academy | 02/2025
- Python Programming - Future Skills, Communications Authority | 04/2024
- Robotics Fundamentals and Introduction to Artificial Intelligence - Future Skills, Communications Authority | 04/2024
- Front End Development - Future Skills, Communications Authority | 03/2024
- Web Development using Django & Python - Future Skills, Communications Authority
- Excel Spreadsheet Program – Hadaf
- Microsoft Office Specialist (MOS) Training - Al-Khwarizmi Institute
